service brief HG Threat

Herjavec Group's Managed Security Services Practice defends global, enterprise-level organizations from increasingly sophisticated, targeted cybercrime threats. Our industry-recognized **HG SOC Operations** take on the day-to-day defense of your infrastructure by monitoring your network, systems and data, 24/7/365. Through a comprehensive suite of **Managed Security Service Offerings**, we deliver an integrated, measurable, threat-centric, and holistic service.

Proactive Threat Detection & Response are critical components to advancing your security posture forward. Many enterprises are challenged to:

- Secure & Retain Threat Hunting Talent
- Stay Ahead of Emerging Threats
- Staff and Maintain a 24/7 Operation to Detect & Respond to events
- Isolate and Disrupt attacks before they become Security Incidents

As part of our mission to drive your **Threat Informed Defense**, the HG Threat Team supports enterprise engagements with cyber intelligence experts, and provides inputs to fuel the HG Threat Intel Platform.

THE HG THREAT APPROACH

Herjavec Group Threat combines Threat Modelling, Active Threat Hunting, and HG Threat Intel to enhance your detection and response capabilities and drive what we call a Threat Informed Defense. We prioritize continuous improvement and support in driving tangible, measurable progress in your security posture by benchmarking your detection & response capabilities against industry frameworks.

HG Threat Modelling and Roadmap Development

Around the clock Security Event Monitoring, Triage & Escalation from HG's SOC 2 Type 2 Geo-Redundant, remote SOC infrastructure.

Active Threat Hunting

The HG Threat Hunting team uses adversarial tactics to hunt across your endpoint tools. Their findings support in blocking and disrupting attacks, improving detection and add further enrichment to the HG Threat Intel platform.

HG Threat Intel

Combining industry leading commercial, government and open-source feeds, with HG engagement specific outputs, the HG Threat Intel platform informs HG SOAR, and enriches our HG MSS escalations with IOC specific data as pivotal part of our HG MSS workflow.

HG THREAT INFORMED DEFENSE

As part of your onboarding to HG Managed Security Services we prioritize threat-centricity by assessing your coverage from existing log sources in alignment with the HG Threat Map, across the MITRE ATT&CK Framework.

We start by completing a Threat Collection Plan.

The **Threat Collection Plan** helps us understand your business and the data sources that matter most. Its inputs are used to populate the HG Threat Intel Platform.

- Security Control Inventory
- 🔋 🖌 Technology Platforms
- 📜 🖌 Security Log Sources
- 🚔 🖌 Brands and Trademarks
- 🔁 🖌 Corporate Leadership Team
- Public Facing Domains/IPs

-
~

We then review your security coverage against the HG Threat Map so we understand where your controls need to be hardened:

- Evaluate your controls against the HG Threat Map, aligned with the MITRE ATT&CK framework
- Ensures the most prevalent attack vectors are detected
- HG's Assessment of top adversaries, techniques and sub-techniques, based on MITRE

Finally, we apply the HG Threat Package to your Security Technologies (SIEM/EDR)

- We apply the HG Threat package where possible, based on your existing-log sources
- Applied at SIEM/EDR level, and integrated with HG SOAR
- Develop a baseline of behavior, and prioritize continuous improvement
- We advance your log sources, security controls, and HG Threat Cases over time
- Playbooks are configured on HG SOAR platform

On a **go forward basis**, you will partner with our HG Customer Success team to continue to advance your detection abilities and your overall security posture.

Our continuous improvement planning involves:

- Log Source Coverage
- Enhanced Detection Ability
- Content Development
- Technology Investment Recommendations
- Service Roadmap Planning

Whether through an independent **Vulnerability Scanning** engagement or packaged into **HG Managed Security Services**, **HG Vulnerability Management** supports an optimized, mature risk program with continuous improvement in reducing threats against your organization.
