

Herjavec Group's Technology Architecture & Implementation Team has expertise in enterprise security architecture & installation. We offer security technology solutions to solve your most complex operational challenges. By combining vendor technology best practices with our practical experience we add significant value to your integrated delivery.

Our Technology Architecture & Implementation Team excels in leading your security projects end-to-end through technology selection, design review, architecture assessment, technology implementation and technology optimization. We are focused on making your enterprise more secure while supporting the achievement of industry or regional compliance.

Our Services Include:
